

Raras Pradnya Pramudita

Master's Student in Information Management and Systems

✉ raras.pramudita@berkeley.edu [📍 Berkeley, CA](#) [🌐 raraspradnya](#) [🌐 raras-pramudita](#)

Summary

- Master's student at UC Berkeley specializing in applied AI/ML. Previously a Senior Technical Architect at Accenture, with 3+ years of experience building cloud-native infrastructure and enterprise-scale systems serving 15M+ users. Passionate about developing AI/ML projects including multimodal systems, generative models, and agentic workflows.

Education

Mas- ter of Infor- ma- tion Man- age- ment and Sys- tems	University of California, Berkeley , Information Management and Systems • GPA: 3.87/4.0 • Coursework: Quantitative Research Methods, Applied Machine Learning, Generative AI, Agentic AI, Data Analytics	Berkeley, CA Aug 2025 – May 2027
Bach- elor of Engi- neer- ing	Bandung Institute of Technology , Computer Science • GPA: 3.64/4.0 • Coursework: Algorithms & Data Structures, Object-Oriented Programming, Data Science & Data Mining	Bandung, Indonesia Aug 2018 – July 2022

Experience

Accenture , Senior Technical Architect	Jakarta, Indonesia May 2022 – June 2025 3 years 2 months
• Architected and deployed cloud-native infrastructure on AWS (EKS, RDS, S3) for high-availability applications serving 15M+ users, achieving 99.9% uptime validated through performance testing. • Built and maintained CI/CD pipelines automating deployment of ~500 APIs using GitLab CI/CD, Jenkins, and Ansible, reducing manual overhead and accelerating release cycles. • Delivered automated ETL pipelines in Python processing 2M+ consumer transaction records, reducing runtime from 10 minutes to under 1 minute. • Executed performance testing using JMeter to validate system scalability, reliability, and adherence to architecture design under varying loads. • Performed data model reviews (tables, queries, indexes) and estimated database storage based on expected daily traffic for new APIs. • Delivered large-scale database migrations using Oracle SQL Data Pump and SQL Loader, achieving error-free transfers and minimizing operational risk.	
Accenture , QA Intern	Jakarta, Indonesia Dec 2020 – Aug 2021 9 months
• Developed automated test scripts using Katalon Studio and Selenium to validate user journeys, ensuring product stability and improve efficiency. • Produced structured reports and metrics during pre-production testing, demonstrating skills in data documentation, reporting, and stakeholder communication.	

Skills

AI / ML: LangChain, LangGraph, PyTorch, TensorFlow, Scikit-learn, Claude, OpenAI API, OpenCV

Programming Languages & Frameworks: Python, SQL, Java, JavaScript/TypeScript, HTML, CSS, Pandas, R, NumPy

Cloud & Infrastructure: AWS (EKS, RDS, S3), Docker, Kubernetes, Helm, GitLab CI/CD, Jenkins, Ansible, Linux, Prometheus, Grafana, ELK Stack

Databases: PostgreSQL, Oracle DB, Redis, Apache Kafka, RabbitMQ

Languages

Indonesian: Native speaker

English: Fluent
